University Projects

A Personal Portfolio Website:

- Create a personal portfolio website showcasing your skills, projects, and experiences.
- Design and develop the website using HTML, CSS, and JavaScript.
- Include sections such as About Me, Projects, Skills, and Contact.
- Customize the design to reflect your personal style and branding.

E-commerce Website Prototype:

- Design and prototype an e-commerce website using Figma.
- Create wireframes and mockups for different pages such as home, product listings, product details, cart, and checkout.
- Include features such as product search, filtering, sorting, and product reviews.
- Present the prototype along with a brief description of its functionality and user experience.

Next.js Blogging Platform

- Led the development of a feature-rich blogging platform using Next.js framework, empowering users to share their thoughts and ideas with the world.
- Implemented user authentication, blog creation, commenting system, and search functionality, enhancing user engagement and interaction.
- Designed and optimized the platform for a seamless browsing experience across desktop and mobile devices, ensuring accessibility for all users.
- Collaborated closely with a cross-functional team of developers, designers, and testers, utilizing Git for version control and adhering to project timelines.
