The development of advertising software is required, in which users can earn money by watching videos or visiting pages. PTC (Pay per click)

Example PTC (Pay per click) interface:

https://tblock.dev/simpleptc/login

User: admin@email.com

Password: admin

Logo:

GENERAL REQUIREMENTS

1. The user creates a profile. The registration form (Create account) will be carried out with the following data
   - Name
   - Select the type of document (CC, TI)
   - Document number
   - Email
   - Cell phone number (+57 Colombia code + 10 digits)
   - Invitation code (Optional)

2. Users cannot post ads, all platform ads are posted by the administrator from the admin panel.

3. All users who enter the platform will have the free package active by default.

Free Package: The user will be able to view up to 50 ads each with a profit of 0.051 USD (Configurable from the administration panel), up to earning a limit of 2.57 USD (Configurable from the administration panel).
Withdrawals of earnings in the free package can be withdrawn only upon completion of all ads.
NOTE: This package can be disabled for new users from the admin panel.

4. Users will be able to purchase a payment package.

Payment Packages: Payment packages can be created from the admin panel where they can be configured.

- Single payment value per ad viewed.
- Number of ads available in the package.
- Package price
- Package status (active, inactive)
- Earnings Withdrawal Period (Days, Months, Years) Earnings for completing viewing package ads can only be withdrawn after this period.
- Package name

NOTE: Each package has a unique value per click, this can be configurable from the admin panel for each package. Both the cost per click and the number of ads per package.

REFERRALS

1. Earnings from referrals are 15% (configurable from the administration panel) per package purchased by direct referral.
2. Referral earnings can be withdrawn immediately. Earnings from referrals will appear in the balance available for withdrawal.
3. For referrals, users will have a link and a user code. Which will facilitate the bonuses.

PACKAGE PAYMENT METHODS

Payments will be made through a payment link inserted in the "pay now" or "purchase" button of each package when publishing it from the admin panel. Payment approval and rejection will be done directly from the administration panel manually.

WITHDRAWAL METHODS

1. Manuals:

Withdrawal methods are manual and will be made only through local virtual wallets (Colombia). The withdrawal methods will be the following:
- NEQUI
- DAVIPLATA
- MOVII

2. Automatic:

Automatic withdrawals will be made with cryptocurrencies. The coinpayments API key integration is requested.

Request withdrawal:

The user must register each account in their profile. The user must enter the following information to register their bank account for withdrawals.

- Document type (CC, TI)
- Document number
- Name
- Choose withdrawal method (NEQUI, DAVIPLATA, MOVII)
- Account number

*The user must be informed through POPUP Notification at the time of confirming the registration that the bank account being registered for balance withdrawals must be in the user's name or the balance withdrawal will not be made.

CURRENCY: The currency will be USD.

LANGUAGE: configurable or Spanish

USER INTERFACE

The user interface is required to have 6 main sections which are detailed below.

Dasboard (Main): All relevant information for the user will be displayed here, such as:

- Active Package (Package Name)
- Available balance in wallet
- Balance available for withdrawal
- Remaining ADS to be seen in active package
- Call to action: Space on the main dashboard to invite the user to upgrade by purchasing a higher package.
- Withdrawal history
- History of purchased packages
- Activity or earnings graph

My ADS: Section where you can see the videos and links to obtain profits. History of ADS viewed (The system will deliver the reward after the user views or visits the destination page for 30 seconds) A dynamic and fun interface is needed for the user.

Wallet: Section for managing the wallet Where the user can make Withdrawals, view the History of withdrawals (Pending, approved), send balances to other users, balances

Account settings: Section for account registration for withdrawals, personal information, account image, 2FA factor, passwords and security.

Support: Support ticket system.

Referrals: Information about referrals, referral earnings, user link to share and referral code to share.

IMPORTANT

Since purchases and balance withdrawals will be manual by the administrator, the user must be informed through POPUP notification of the package activation times and balance withdrawal times (from 12 to 48 hours) when making a purchase. packages or balance withdrawals.
